American Standard for Nursery Stock Box size to container size equivalents

Table 1 – Container class volume ranges

Container class specification	Container volume range		Box size equivalent
	Cubic Inches Min - Max	Cubic Centimeters Min - Max	
#20	4520 - 5152	74096 - 84457	20-inch box
#25	5775 - 6861	94669 - 112472	24-inch box
#45	9356 – 11,434	153317 – 187377	36-inch box
#65	13514 - 16517	221456 – 246051	42-inch box
#95/100	20790 – 25410	340686 - 416394	48-inch box

1.1.3.7 Box size equivalents

For purposes of the Table 1, box size “equivalent” indicates that a box size may be specified in lieu of the indicated equivalent container class, and nursery stock in an equivalent box size shall be accepted in the trade as in conformance with a specification for container grown nursery stock in the equivalent container class indicated, and vice-versa. Boxes are not required to have volumes that are “equal to” or within the volume range of the indicated equivalent container class, or vice-versa.
